# List of Appendices

Appendix A ......................................................................................................................... Bibliography: Electronic Copies
Appendix B .......................................................................................................................... Electronic Library
1 INTRODUCTION

Engineering, environmental, scientific and other works in the Nechako watershed began in the 1950s with the approval to construct a hydroelectric power plant at Kemano to generate electricity for the Alcan aluminum smelter in Kitimat, BC. The reservoir for the power plant was created through the construction of the Kenney Dam on the Nechako River. Over fifty years of studies associated with the watershed have subsequently been conducted, particularly as part of the proposed continuation of the Kemano Project (the “Kemano Completion Project”) and following its cancellation in 1995. A Settlement Agreement reached in 1997 between Alcan and the Province of British Columbia called for the formation of the Nechako Environmental Enhancement Fund, whose Management Committee published a report in 2001 recommending the construction of a Cold Water Release Facility (CWRF).

The Nechako Enhancement Society (NES), with representatives from Alcan and the Government of British Columbia, was formed in 2002 to implement the Nechako Watershed Council (NWC) “Work Plan for the Cold Water Release Facility at Kenney Dam”2. The following sections update and expand the key deliverable of Activity 4 of the NWC Work Plan: a bibliography of existing information concerning the CWRF. This updated bibliography includes 1084 reports and other works completed up to March 2009 regarding the Nechako River, the Kemano Project, the proposed Cold Water Release Facility, and the Cheslatta watershed. In particular, many new entries have been included concerning the Cheslatta watershed. Electronic copies of this bibliography, in three formats (MS Word document, MS Excel spreadsheet, and ProCite database) are included in Appendix A. A digital library with copies of 248 documents is included in Appendix B.

The updated bibliography builds upon previous work completed in 20063 and 20024. The bibliography is an essential tool for planning major works in the Nechako watershed such as a water release facility at Kenney Dam.

2 METHODS

The bibliography was compiled using many libraries and databases. The search terms “Nechako”, “Kemano”, “Kenney Dam”, and “Cheslatta” were used in the subject, title and keyword fields of the following library catalogues:

Federal Departments and Research Institutes

- Canadian Institute of Scientific and Technical Information (CISTI)
- Canadian Wildlife Service Online Publications\(^5\)
- Fisheries and Oceans Library, Pacific, and Nechako Fisheries Conservation Program\(^6\)
- Geological Survey of Canada Libraries, Calgary and Vancouver\(^7\)
- National Library of Canada, Ottawa

Provincial Government Departments

- B.C. Ministry of Forests Online Catalogue\(^8\)
- B.C. Ministry of Environment Cross Linked Information Repositories\(^9\)
- B.C. Ministry of Energy Mines and Petroleum Resources Library Online Catalogue\(^10\)

University Libraries

- College of New Caledonia, Prince George
- Simon Fraser University, Burnaby
- University of Alberta, Edmonton
- University of Calgary, Calgary
- University of Northern British Columbia, Prince George
- University of British Columbia libraries, Vancouver
- University of Victoria Library, Victoria

Public Libraries

- Vancouver Public Library
- Greater Victoria Public Library
- Prince George Public Library

Rio Tinto Alcan Libraries

- Rio Tinto Alcan Kemano Completion Project Catalogue
- Rio Tinto Alcan, Vancouver Catalogue

\(^6\) [http://www-heb.pac.dfo-mpo.gc.ca/NFCP/Reports.htm](http://www-heb.pac.dfo-mpo.gc.ca/NFCP/Reports.htm)
\(^7\) [http://ess.nrcan.gc.ca/esci/libcat_e.php](http://ess.nrcan.gc.ca/esci/libcat_e.php)
\(^8\) [http://www.for.gov.bc.ca/hfd/library/](http://www.for.gov.bc.ca/hfd/library/)
\(^9\) [http://www.env.gov.bc.ca/clir/](http://www.env.gov.bc.ca/clir/)
The following databases were checked using the search terms “Alcan”, “Nechako”, “Cheslatta”, “Kenney Dam”, “coldwater release”, “riparian + British Columbia”, and “river + restoration”.

- AGRICOLA
- Aquatic Sciences and Fisheries Abstracts
- CGRG Bibliography of Canadian Geomorphology
- GeoRef
- GeoScan
- BIOSIS Preview
- OUTLOOK Online, internet catalogue of B.C. public, college and institute libraries
- OVID
- Web of Knowledge

Rio Tinto Alcan, Triton Environmental Consultants Ltd. and Wilson Hydrotechnical Services Ltd. also provided references, particularly engineering reports.

Documents found included journal articles, consultant reports, government reports, hearing testimonies, video-recordings, and maps. The citations were entered into ProCite for Windows, Version 5.0 (©1995-1999 ISI Research Soft.). Where possible, hardcopy locations of the documents have been provided. The ProCite database was exported to MS Word for report production and to MS Excel to provide an alternative searchable/sortable format; digital copies of the bibliography in ProCite, MS Word and MS Excel formats are available in Attachment A. When available, digital copies were written to CD in portable document format (Attachment B).

In order to assist bibliography users to locate documents, all of the bibliography entries were assigned to groups in the ProCite database (e.g., geomorphology, juvenile chinook salmon, etc.) based on the information contained in the title of each reference. Each group is represented as a subsection heading in Section 3.0 of this report. Some of the documents will appear in multiple categories as they encompass more than one type of information. All documents are also listed by author name in Section 4.0.

Entries in the digital library can be identified by their unique reference identification number (Record #), as well as by author name and year. They are sorted into folders by group. Bibliography entries that are included in the digital library are listed as “In File” under “Library Status”. A list of the hard copy location codes is provided in Section 5.0.
