The Parties recognize that this Agreement is the result of negotiations conducted within the context of current legislation, jurisprudence and government policy and as such, does not constitute, and shall not be interpreted as, evidence of the nature or extent of Aboriginal or treaty fishing rights and is made without prejudice to the positions taken by either Party with respect to Aboriginal or treaty rights or title.

- 1(2) The Aboriginal Organization agrees to limit the fishing by the First Nations and their members to fishing as set out in this Schedule or elsewhere in this Agreement.
- 1(3) Notwithstanding subsection 1(2), nothing in this Schedule or the Communal Licence will prevent the First Nations and their members from fishing under the authority of any other licence issued under the *Fisheries Act* and the regulations made pursuant to that Act.

- 2(2) The Parties will develop a stock harvest management plan, the objective of which will be to provide the Aboriginal Organization with a reasonable opportunity to catch the fish set out in subsection 1(1) while balancing exploitation rate across stocks and timing groups to ensure adequate escapement of all stocks and timing groups.

3. Habitat Restoration**\$61,100.00**(a) Implementation of Habitat Protection

(i) Beaver Control Program

A beaver control program is ongoing and was recommended as part of a restoration strategy in the 1994 biophysical study of the Endako River/Shovel Creek drainage. The project is administered by the Burns Lake Band and involves population control. The following specific beaver control area is targeted for the 1999/2000 Fiscal Year:

a. Endako River

(ii) Endako River Stream Clearance

This project involves the removal of beaver dams and debris blocking the stream channel in situations where fish access to spawning grounds is impeded. Proposed beaver dam and debris removal will be referred to the appropriate federal and provincial authorities for approval, prior to commencing work.

(iii) Nithi River Flow Control and Hydrometric Station

Nithi River is experiencing extremely low flow problems. This is a large scale project involving the storage of water for release during periods of low flow. The initiative is sponsored by the provincial Ministry of Environment. The Carrier Sekani Tribal Council contribution will go towards construction of the hydrometric station and operating cost of this station as well as the operation and maintenance of the flow control structure.

(iv) Stuart Lake Watershed Stream Habitat Improvement

a. Sowchea Creek Bio-Physical Survey

The project involves an inventory and assessment survey in 1999.

b. Sakeniche River Bio-Physical Survey

The project involves an inventory and assessment survey in 1999.

4. Fish Enhancement**\$33,100.00**(a) Feasibility Studies

(i) Sockeye Salmon Restoration -Ormond Creek

This experimental project began in 1996. Fertilized sockeye salmon eggs from the Stellako River are placed in the streambed of Ormond Creek. This exercise has been conducted annually since 1996 and will be repeated in 1999. In addition, an assessment of fry survival will be made the spring following the year of each transplant.

- b. Stellako River Adult Sockeye Salmon Enumeration
- c. Endako River Adult Chinook Salmon Enumeration

(iii) Endako River Water Gauging

A cooperative arrangement is set up with Water Survey of Canada whereby a flow monitor gauging station, complete with temperature recorder, will be operated throughout the year. The gauging station site is located at the outlet of Burns Lake.

(iv) Fisheries Gene Bank Program

This project is a joint program with other Fraser River First Nations. It involves storing frozen sperm from male salmon collected from endangered stocks.
